DESIGN-BUILD-REMODEL

Client wish list

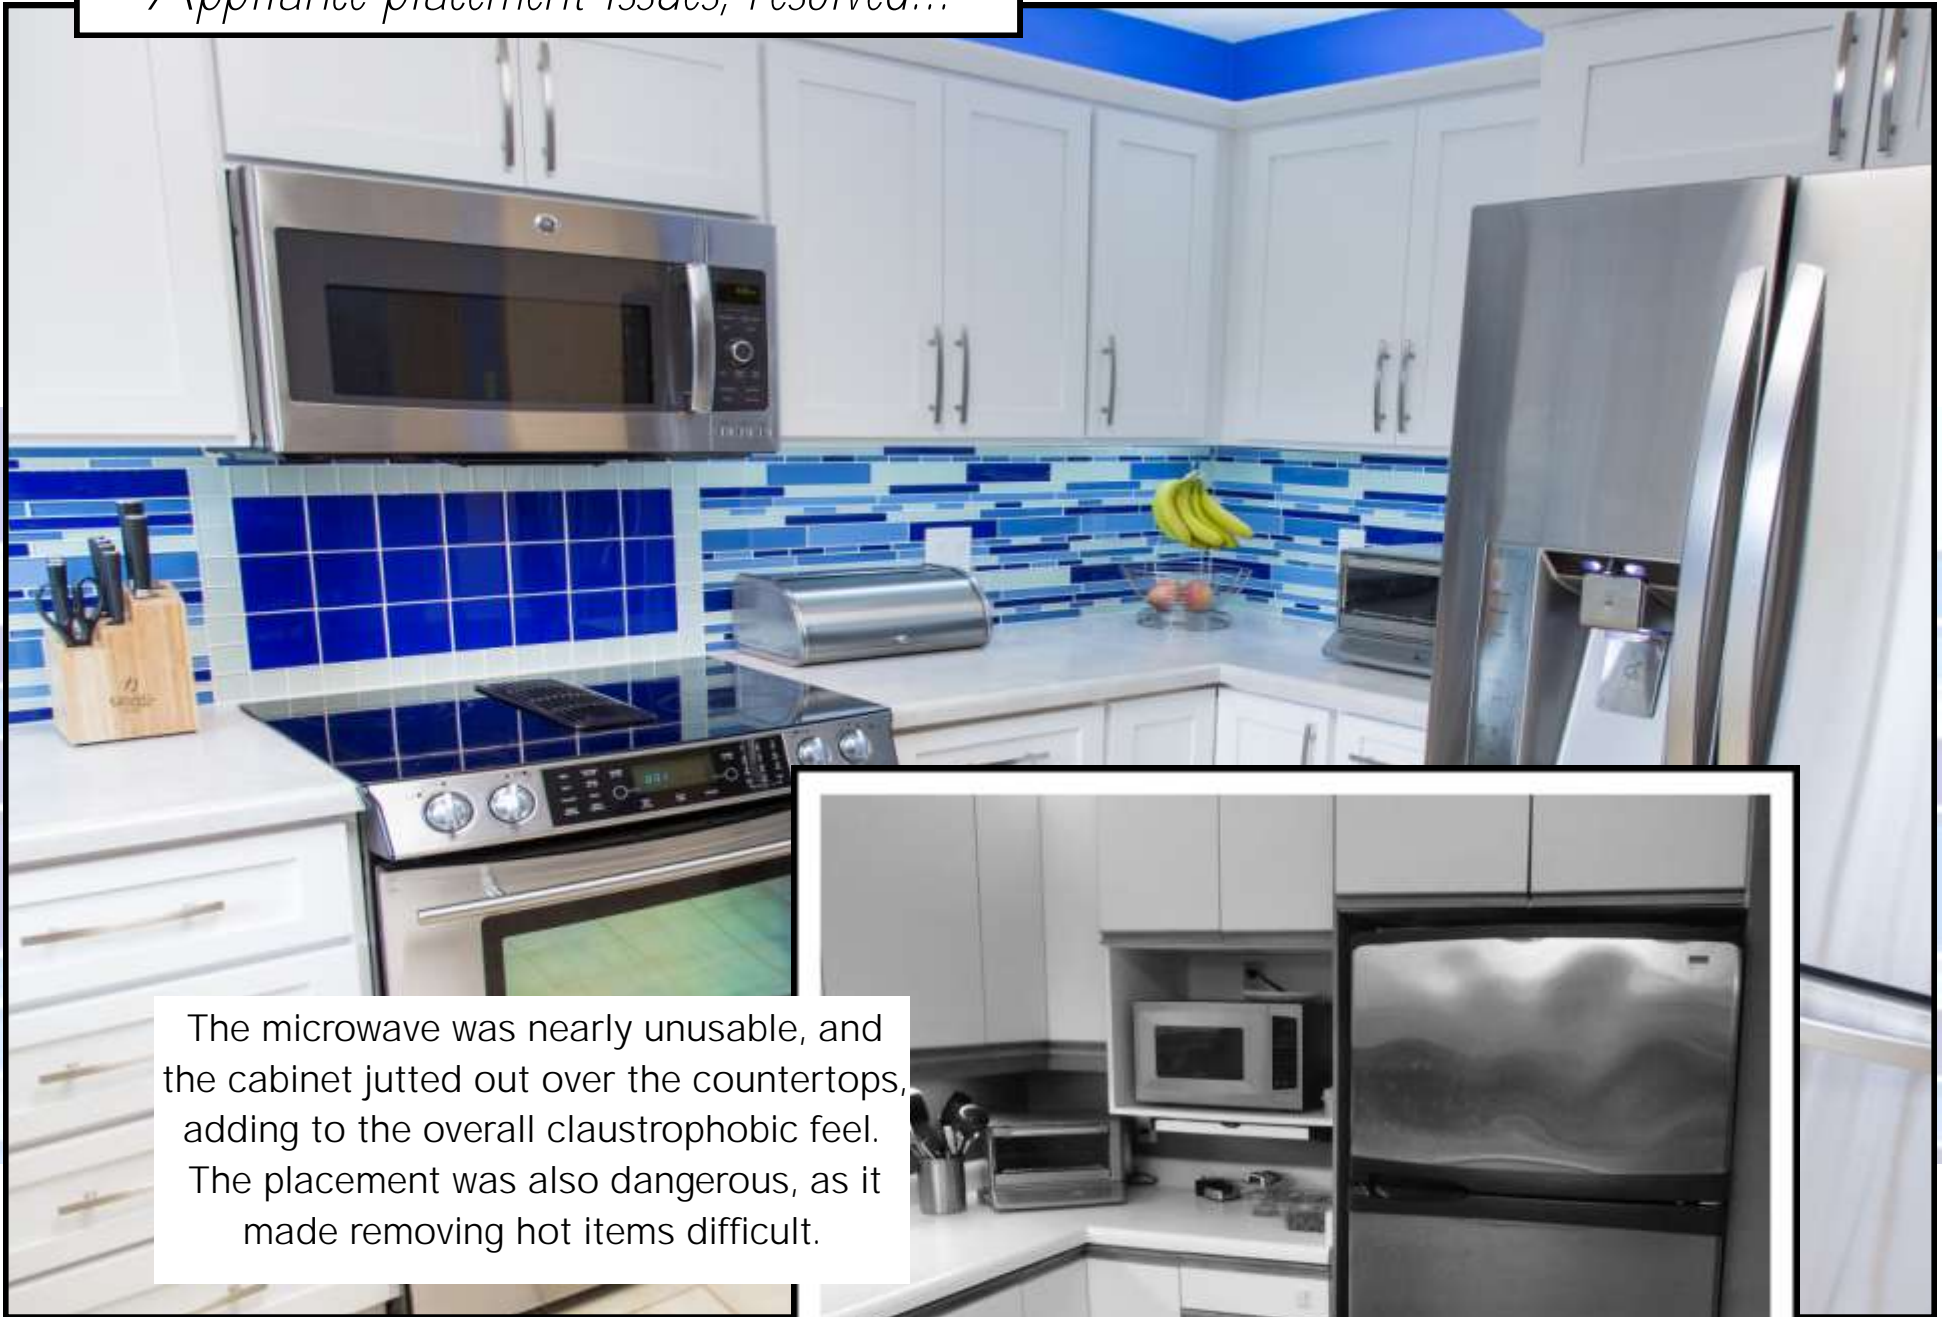

These clients had a very specific wish list for rearranging the kitchen. They enjoy cooking and had very large appliances they needed to hide. Permanent appliances, like the microwave, were placed in inconvenient places. They needed a well organized system, with easy access to spices and more drawer space. Lighting in the space was not user friendly. Design issues, like the kitchen sink being offset on the window had to be addressed with a tight client budget in mind. The kitchen was closed off with an “L” shaped counter. This left about two feet of space between the table and the counter. Removing these cabinets allowed for the open space they had hoped to achieve.

Appliance placement issues, resolved...

The microwave was nearly unusable, and the cabinet juttred out over the countertops, adding to the overall claustrophobic feel. The placement was also dangerous, as it made removing hot items difficult.

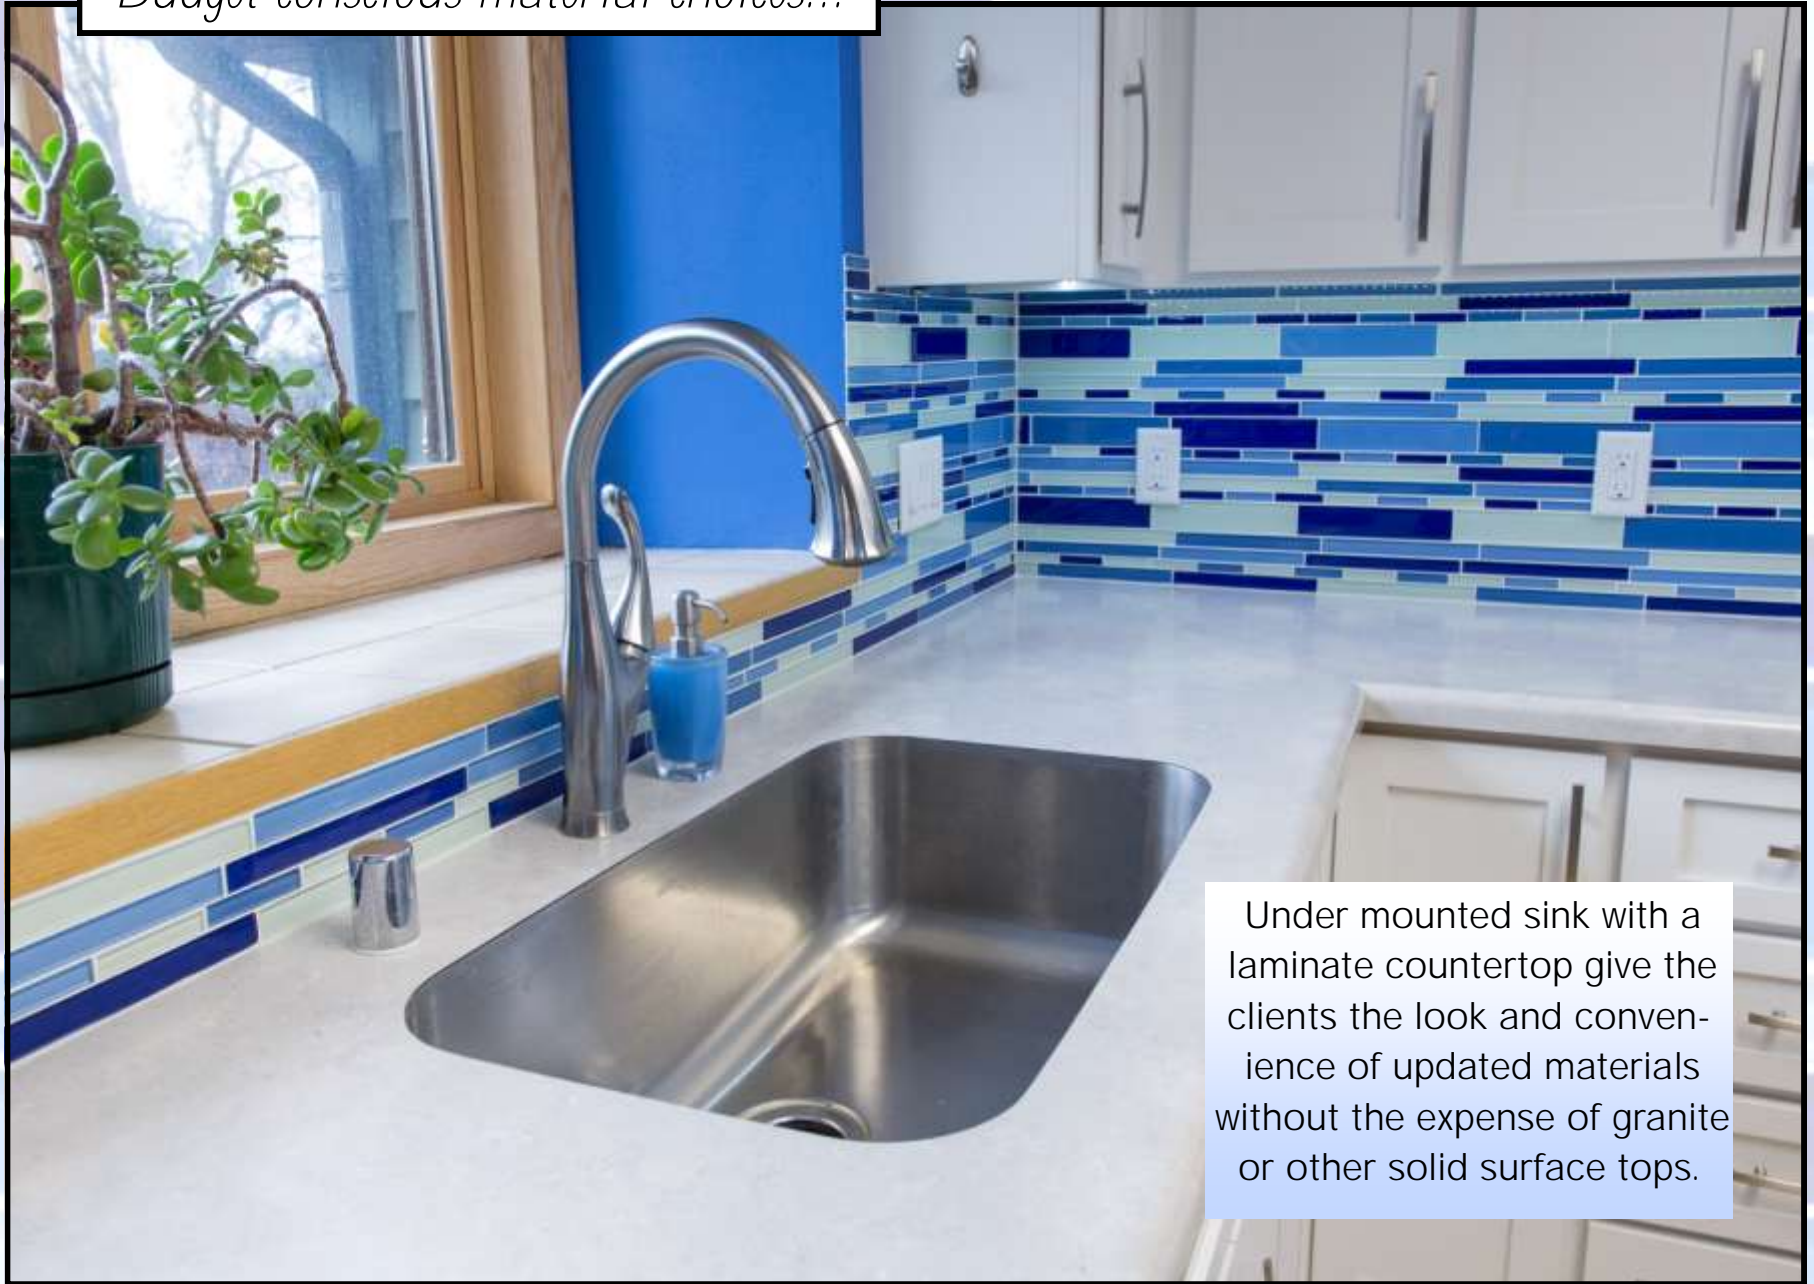

Unsightly *storage issues* were resolved with crisp clean cabinets and drawers. Upper cabinets were added and countertop storage was removed to provide *generous* work space.

Budget conscious material choices...

Under mounted sink with a laminate countertop give the clients the look and convenience of updated materials without the expense of granite or other solid surface tops.
